

A SUMMER SCHEDULE FOR HOME MAINTENANCE

Most places in the US can get quite hot in the summer months, so it's particularly important to prepare your home for the intense heat it might experience, as well as the potential for drought.

- * Repair any cracks in your sidewalks, driveway, and foundation.
- * If needed, restain the deck and repair any damage the winter may have caused.
- * Ensure your HVAC system is in proper working order by changing its air filter.
- * Don't forget to test your smoke alarms, carbon monoxide detectors, and fire extinguishers.
- * Trim hanging tree branches and shrubbery.
